Infosec Engineer

| 2022-07-01 – Present

As a Cybersecurity Engineer at IDfy, I played a pivotal role in safeguarding our organization's critical infrastructure.

- Established a unified security posture through a centralized multi-cloud SIEM platform, enhancing threat detection and response capabilities
- Performed Multiple Vulnerability assessments for company assets
- Developed and maintained custom security scripts and tools to automate routine tasks and improve efficiency.
- Collaborated with development teams to ensure secure coding practices and adherence to security standards.
- Responded to security incidents, conducted root cause analysis, and implemented corrective measures to prevent future occurrences.
- Contributed to a secure and resilient organization by proactively identifying and addressing potential security risks.

Infosec Engineer [Internship]

| 2022-01-01 – 2022-06-30

Gain practical cybersecurity experience as an intern at IDfy, where I contributed to enhancing application security. I performed comprehensive vulnerability assessments (VAPT) on critical applications, identifying and mitigating potential risks.

- Collaborated with development teams to address identified vulnerabilities.
- Provided detailed vulnerability reports with remediation recommendations.
- Enhanced communication and collaboration between security and development teams.

PHP Developer [Internship]

| 2021-06-01 – 2021-08-01

Successfully created a Moodle Plugin that extracts various exam analytics.

- Demonstrated expertise in creating a tailored Moodle [exam portal] plugin to address specific analytics requirements.
- Successfully extracted relevant data from Moodle's database and performed in-depth analysis to derive meaningful insights.
- Identified trends and patterns in student behavior and performance to support targeted interventions and improve overall learning outcomes.
